Freida McFadden ~ Do You Remember?

Just read Brain Damage by Freida (then a Davenport book) but I hope this one is as good.
Started on 3/13/26. Finished on 3/20/26. Yep 7 days.

Groundhog day except you forget what happened the day, week, month before.
She started a small company that grew to a multi-million dollar corporation. Her husband wanted control and she thought she had a tumor in her brain.
Turns out she remembers more than she thought. She was never really in love with him but with someone else.

Great book. Chapters were short, characters all well written.
9/10
