

Susi Holiday – The Hike

This is an Amazon First Read for September 2022. I started it on 9/27/2022. First time reading this author.

10/11/2022. I finished this book. I didn't really care for it at all. The characters were muddy. I couldn't remember who was who and who was married to who and who killed who. The writing style was OK. I like the fact that chapters were broken into segments of the day so at least you could keep a timeline of events. Catherine and Paul, Ginny and Tarryn. Those are the four main characters. They go for a hike that has been planned. There is an plot to kill 2 or three of them by one of them. Doesn't go as planned but some how the one gets away.

Just based on my opinion I didn't really care for the book but I'm still going to give it a 6/10 rating. 14 days to read.

Glad it's over.
